MERN Full Stack Developer

Summary

B.E. graduate in Electronics and Telecommunication with expertise in MERN stack development (React.js, Next.js, Node.js, MongoDB). Skilled in building responsive, full-stack web applications with a focus on user experience and secure APIs. Passionate about leveraging modern technologies, including AI, to create innovative solutions.

Education

B.E., Electronics and Telecommunication

2019–2023

TSSM's BSCOER, Pune, Maharashtra

First Class with Distinction

HSC

YCIS Satara, Maharashtra

2018

SSC

AKV Satara, Maharashtra

2016

Technical Skills

- **Frontend:** React.js, Next.js, HTML, CSS, JavaScript, TypeScript, Tailwind CSS
- **Backend:** Node.js, Express.js, RESTful APIs
- **Databases:** MongoDB, MySQL, SQL
- **Tools:** Git, GitHub, Postman, VS Code, Figma
- **Operating Systems:** Windows, Kali Linux

Professional Experience

ZyberWeave – Professional Company Website

May 2025

Website: <https://www.zyberweave.com/>

- Developed a professional company website using Next.js and Tailwind CSS, ensuring responsive design across devices and browsers.
- Built interactive UI components with Styled Components, focusing on seamless navigation and modern aesthetics for enhanced user engagement.
- Integrated WhatsApp functionality to send inquiry messages directly to the business upon user click, streamlining client communication.
- Implemented dynamic navigation for key sections (e.g., services, about, contact), allowing users to access dedicated pages seamlessly.

Lynk Digital – Digital Agency Website

2025

<https://www.lynkdigital.co.in/>

- Developed a professional digital agency website using Next.js and Tailwind CSS, ensuring responsive design and optimal performance across devices.
- Built dynamic sections for services, portfolio, and contact, integrating form validation and email notifications for client inquiries.
- Focused on modern aesthetics and user engagement with interactive UI components and smooth navigation.
- Tech Stack: Next.js, Tailwind CSS

Columbus Tours India – Travel Booking Website

Apr 2025

Website: <https://www.columbustours.in/>

- Developed user-facing features for a tourism website using Next.js and Tailwind CSS, ensuring responsive design across devices.

- Built tour selection and inquiry submission modules with form validation, integrating email notifications for seamless business-user interaction.
- Integrated WhatsApp functionality to send inquiry messages directly to the business upon user click, enhancing accessibility.
- Implemented dynamic navigation for tour pages, enabling users to click on specific tours (e.g., Dubai, Bhutan) and navigate to dedicated tour information pages.

Intern, Scalefull Technologies LLP

Feb 2024 – Aug 2024

- *HealSync*: Engineered a healthcare appointment portal with React.js, Node.js, and MongoDB, deployed at <https://heal-sync-rosy.vercel.app/>.
- Designed RESTful APIs for CRUD operations, supporting patient, doctor, and admin logins with role-based access control and secure authentication (JWT).
- Implemented appointment booking with time slot selection for patients, allowing doctors to accept/decline appointments and view daily earnings.
- Enabled post-appointment payments (cash/UPI) via patient dashboard, with admins able to add/delete doctors and manage availability schedules.

Projects

Gemini Clone – AI-Powered Chat Assistant

2024

<https://gemini-clone-blue-eight.vercel.app/>

- Developed a frontend-only AI-driven chat assistant using Next.js, fetching real-time responses from the Gemini API for dynamic conversations.
- Designed a responsive, minimalist UI with Tailwind CSS, ensuring smooth user interaction across devices with a focus on accessibility.
- Tech Stack: Next.js, Node.js, Tailwind CSS, Gemini API

GreenKart – Online Grocery Shopping Platform

2024

<https://green-kart-frontend.vercel.app/>

- Built a full-stack e-commerce platform with Next.js, Node.js, and MongoDB, featuring a seller dashboard for managing inventory.
- Enabled sellers to add, track, show, or hide products, with real-time updates on stock availability and sales analytics.
- Implemented user login, product ordering with cart functionality, rating system, order history tracking, and payment options (COD/online via Stripe).
- Tech Stack: Next.js, Node.js, MongoDB, Tailwind CSS, Stripe, JWT

Blogging Platform – Dynamic Content Publishing Website

2024

<https://blogging-website-vercel.vercel.app/>

- Developed a full-stack blogging website using React.js, Node.js, and MongoDB, enabling user-driven content creation.
- Built RESTful APIs with Node.js and Express.js for user authentication (JWT), blog writing, saving drafts, and tag-based filtering for easy content discovery.
- Created a responsive UI with React.js, supporting login/register, profile management (change password, profile picture), and blog interactions (like, comment).
- Tech Stack: React.js, Node.js, MongoDB, Tailwind CSS, JWT

Certifications

- Certified Ethical Hacker, EC-Council 2024
- MERN Stack Developer, Wisdom Sprouts 2024
